EDUCATION

Massachusetts Institute of Technology & Woods Hole Oceanographic Institution Cambridge, MA
Ph.D. in Physical Oceanography and Climate Science September 2021 – Present

University of California, Irvine Irvine, CA
B.S. in Mathematics, Concentration in Data Science September 2018 – June 2021

RESEARCH EXPERIENCE

Woods Hole Oceanographic Institution Sep. 2021 – Present
Advisor: Geoffrey Gebbie Woods Hole, MA

- Ran several coarse resolution global ocean simulations using the MITgcm to diagnose the causes of deep ocean cooling in an global data assimilation effort by NASA
- Analyzed 15TB+ of next-generation high-resolution coupled climate model output to understand the connections between ocean circulation and dissolved compounds in the ocean
- Produced written reports, posters and presentations to communicate findings to broader communities

Woods Hole Oceanographic Institution Sep. 2021 – Sep. 2023
Advisor: Hyodae Seo Woods Hole, MA

- Processed and analyzed 3TB+ of climate data and found significant connections between near-shore sea surface temperature and extreme California precipitation events
- Developed tools to analyze big climate data using Python and Julia

Los Alamos National Laboratory Jun. 2021 – Aug. 2021
Advisor: Mark Petersen Los Alamos, NM

- Implemented parallel reduced-precision capabilities within the ocean component of the Energy Exascale Earth System Model
- Found that reduced precision marginally reduced compute time (i.e. energy consumption), but at the cost of model skill

Institute for Pure and Applied Mathematics Jun. 2020 – Sep. 2020
Advisor: Thomas Merkh Los Angeles, CA

- Co-developed Q-learning and Deep Q-learning algorithms to improve satellite network communication efficiency for the Aerospace Corporation
- Empirical models were built in Python primarily using PyTorch and NetworkX
